Challenger 300, 600 Series and 800 Series Advisory Committees

The membership of the Advisory Committees consists of volunteer maintenance, technical specialists and flight crew personnel who are operating registered aircraft or providing support services as approved service providers. Their mandate is to promote safety and improve the operation, maintenance, service and support of Bombardier Business Aircraft by obtaining, evaluating and prioritizing data solicited from aircraft operators and maintenance personnel regarding operation and support of the aircraft, formulating input and recommendations through a free flowing exchange of information.

The committee members are “your” representatives and they welcome your feedback to improve your customer experience.

The latest contact information and documentation for your Technical Committee is available on the CIC web site at <http://www.cic.bombardier.com>. Once you have logged in to the password-protected site, select “Forums & Committees”, “*Advisory Council*”.

The Advisory Committee works closely with Bombardier to provide insight on emerging and ongoing Operator fleet issues. You may submit your fleet issues to the Committee by filling out the "Proposed New Issues" form on the Customer Advisory Committee website.
