NOTES

NBAA Learjet Technical Committee

MISSION STATEMENT

To promote safety and improvement in the operation, maintenance, service and support of Bombardier Aerospace Learjet Business Aircraft by obtaining and evaluating data solicited from aircraft operators and maintenance personnel regarding the operation and support of the aircraft, formulating input and suggestions and providing them to the manufacturer through a free-flowing exchange of information.

The committee members are “your” representatives and they welcome your feedback to improve your customer experience.

The latest contact information and documentation for your Technical Committee is available on the CIC web site at <http://www.cic.bombardier.com>. Once you have logged in to the password-protected site, select “Forums & Committees”, “*Advisory Council*”, or visit our new “Advisory Committee Corner” from the Quick Links section.

The Advisory Committee works closely with Bombardier to provide insight on emerging and ongoing Operator fleet issues. You may submit your fleet issues to the Committee by filling out the “Proposed New Issues” form on the Customer Advisory Committee website.
